

PALLET SUPPLY · COLLECTION · RECYCLING

Pallet supply, collection and management for UK businesses

Whichever way pallets move through your business — in, out or back again — one Southampton company handles it.

www.palletmove.co.uk

One company for the whole pallet cycle

Palletmove is a corporate pallet business based in Southampton, trading since November 2016. We supply pallets, buy and collect surplus stock, recover and recycle timber, and manage the whole cycle for single sites and multi-site operations.

Every pallet we handle is assessed for reuse first. What can safely go back into service is repaired and graded; what cannot is recycled through the correct waste route. It keeps your costs down and gives you clean figures for reporting.

Supply

New, reconditioned and graded used pallets – single pallets through to full loads and account supply.

Collect & buy back

Scheduled or one-off collections, backlog clearances, and payment for surplus pallets that still hold value.

Recover & recycle

Repair and reuse first, timber recycling second – with reporting agreed before work starts.

Since 2016

Trading from
Southampton

No minimum

One pallet to full loads

Same day*

On orders placed before
10am

The South

M3/M4 corridor and
London

*Same-day delivery is subject to stock, vehicle availability, order size and confirmation of the destination. We confirm it with you before you rely on it.

Wooden pallets for every load

Tell us the footprint, quantity and delivery date. Delivery is priced with your quote, by load and postcode. Not sure which pallet suits the load? We will help you choose.

MOST REQUESTED

UK standard pallets

1200 × 1000 mm

The standard footprint for UK distribution. Supplied new, reconditioned or graded used — by the load or on account. Light, medium and heavy perimeter-base builds available.

EUROPEAN MOVEMENTS

Euro pallets

1200 × 800 mm

The footprint used across European and pooled-equivalent movements. Stamped EPAL in A and B grades, plus unstamped lightweight Euro-size pallets. EPAL authenticity is confirmed separately.

Graded used & reconditioned

Repaired, sorted and graded stock supplied against a written specification, keeping serviceable pallets in use for longer.

CP, plastic & specialist

CP pallets (CP1-CP9)

Chemical-industry profiles for when the CP classification is specified.

Type	Size (mm)
CP1	1000 × 1200
CP2	800 × 1200
CP3	1140 × 1140
CP4	1100 × 1300
CP5	760 × 1140
CP6	1000 × 1200
CP7	1100 × 1300
CP8	1140 × 1140
CP9	1140 × 1140

Plastic pallets

Nestable, stackable and hygienic plastic pallets for washdown, food, pharmaceutical and closed-loop applications where timber is unsuitable.

Export & ISPM15

Heat-treated, marked wood packaging for international movements – including GB to EU in both directions.

Presswood

Nestable moulded pallets for light, space-constrained and export loads. Exempt from ISPM15 treatment.

Bespoke

Non-standard footprints, heavier constructions and application-specific builds, made to order.

SIZES WE SUPPLY (MM)

1200 × 1000

1200 × 800

1200 × 1200

1140 × 1140

1300 × 1100

1140 × 760

1600 × 1200

800 × 600

600 × 400

Custom

COLLECTION, CLEARANCE & RECOVERY

Need pallets collected?

We clear empty and surplus pallets from your site, buy back what still has value, recycle what does not, and manage pallet flow across multiple sites.

1 Pallet collection

Scheduled or one-off collection of unwanted, surplus and damaged pallets from one site or a whole network.

2 Pallet clearance

Planned removal of a backlog where yard space, blocked bays, safety or fire risk have become the problem.

3 We buy surplus pallets

Where pallets hold value, we assess type, grade and volume and pay for what we take away.

4 Pallet recycling

Timber recovery for pallets that cannot safely re-enter service, handled through the correct waste route.

5 Recovery & reuse

Repair and reuse assessed first, so serviceable pallets stay in circulation instead of being written off.

6 Pallet management

Ongoing management of pallet flow, returns, exceptions and reporting across your operation.

Nationwide & multi-site

One contact, one agreed process and one consolidated record across every location in scope – with agreed collection triggers and one escalation route.

RECOVERY FIRST

Reuse before recycling, recycling before disposal

Every pallet we collect is assessed for reuse before any recycling route is considered. It keeps pallets in circulation, keeps your costs down and gives you clean figures for environmental reporting.

01

Collect

Vehicles matched to your site access and loading method.

02

Sort & grade

Pooled CHEP, LPR and IPP stock separated and returned to its owner.

03

Repair & reuse

Serviceable pallets repaired, graded and put back into supply.

04

Recycle

Timber that cannot be reused is recovered through the correct waste route.

Need reporting? We agree what is recorded, how often it is reported and who signs it off — before work starts.

Built for operations where pallets never stop moving

Manufacturers

Continuous inbound flow, mixed pallet types and no space to hold what arrives.

Distribution & wholesale

Volumes that swing with the season and surplus with real recoverable value.

3PLs & contract logistics

Pallets held for several clients, each needing its own record.

Multi-site organisations

The same problem at every location, solved one consistent way.

HOW ORDERING WORKS

1

Tell us what you need

Type, quantity, delivery site and date. Unsure? Describe the load and we will specify it.

2

We confirm & price

Footprint, entry, load, grade and treatment agreed. Delivery priced with the pallets.

3

We deliver

Same-day where available on orders before 10am; next-day and planned dates booked at quote.

4

Keep it moving

Recurring deliveries and account supply – run closed-loop with collection.

EXPORT & COMPLIANCE, STATED PLAINLY

ISPM15. Solid wood packaging used in international trade generally has to be heat-treated and marked – including between Great Britain and the EU in both directions.

Packaging rules are separate. EU and UK packaging obligations are distinct from ISPM15 plant health. We flag where one may apply and point you to the official source.

TALK TO PALLETMOVE

Tell us what pallets you need

Give us the type, quantity, delivery site and date and we will price it. We can collect your surplus pallets or set up a multi-site contract at the same time.
